Location: New York, NY

Professional Summary

Data-driven and detail-oriented Machine Learning Engineer with over 5 years of experience in building AI models for natural language processing and computer vision. Proficient in leveraging cutting-edge technologies to solve real-world problems and deliver actionable insights. Passionate about developing scalable and efficient AI-driven solutions.

Skills

- Programming: Python, R, Java, SQL, C++
- Machine Learning: Scikit-learn, TensorFlow, PyTorch, Keras
- Data Engineering: Hadoop, Spark, Apache Kafka
- NLP: Hugging Face, SpaCy, NLTK, BERT
- Tools: Docker, Kubernetes, AWS, Azure, Git
- Soft Skills: Team collaboration, problem-solving, leadership

Professional Experience

AI Engineer

ABC Tech Solutions, New York, NY

Jan 2020 – Present

- Designed and deployed machine learning models to enhance product recommendations, leading to a 15% increase in customer retention.
- Implemented an NLP-based chatbot, reducing customer query resolution time by 25%.
- Collaborated with cross-functional teams to optimize data pipelines, cutting data processing time by 40%.
- Conducted A/B testing and model evaluation to ensure accuracy and reliability of AI systems.

Data Scientist

XYZ Analytics, Boston, MA

Jun 2017 – Dec 2019

- Built predictive models for financial forecasting, improving accuracy by 20%.
- Automated ETL processes, reducing manual efforts by 30%.
- Visualized insights using Tableau and Power BI, aiding decision-making for stakeholders.

Education

Master of Science in Computer Science

University of California, Berkeley

Graduation: May 2017

- Focus: Artificial Intelligence, Big Data Analytics

Bachelor of Science in Computer Science

University of Texas, Austin

Graduation: May 2015

- Focus: Software Development, Data Structures

Certifications

- Google Professional Machine Learning Engineer
- AWS Certified Solutions Architect – Associate
- Certified Kubernetes Administrator (CKA)

Projects

1. Sentiment Analysis Tool

- Developed an NLP-based sentiment analysis tool to analyze customer feedback, improving sentiment accuracy by 90%.

2. Image Recognition System

- Built and deployed a deep learning model for image classification with 95% accuracy using TensorFlow.

3. Fraud Detection System

- Designed an anomaly detection model to identify fraudulent transactions in real-time, reducing fraud by 30%.

Interests

- Open-source contributions to machine learning libraries
- Writing blogs on AI and data science trends
- Hosting workshops and mentoring young professionals in AI
